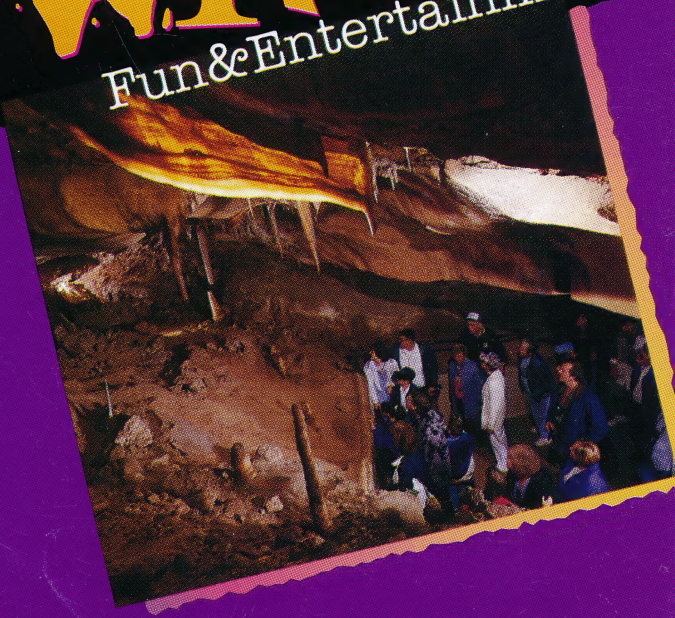
Year Round

Cave of the Winds

Fun & Entertainment



SEE A Mountain.... from the inside out.

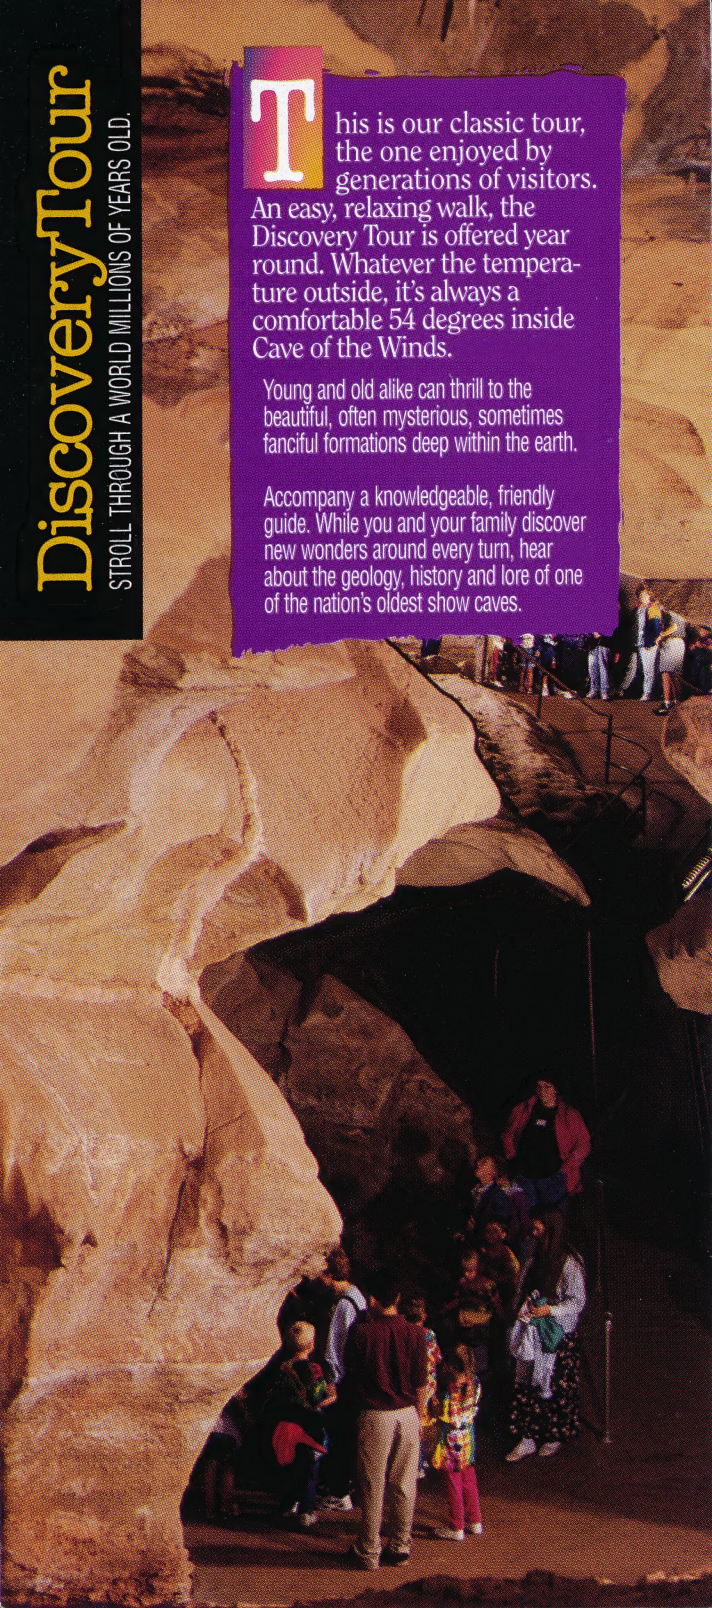
Discovery Tour

STROLL THROUGH A WORLD MILLIONS OF YEARS OLD.

This is our classic tour, the one enjoyed by generations of visitors. An easy, relaxing walk, the Discovery Tour is offered year round. Whatever the temperature outside, it's always a comfortable 54 degrees inside Cave of the Winds.

Young and old alike can thrill to the beautiful, often mysterious, sometimes fanciful formations deep within the earth.

Accompany a knowledgeable, friendly guide. While you and your family discover new wonders around every turn, hear about the geology, history and lore of one of the nation's oldest show caves.



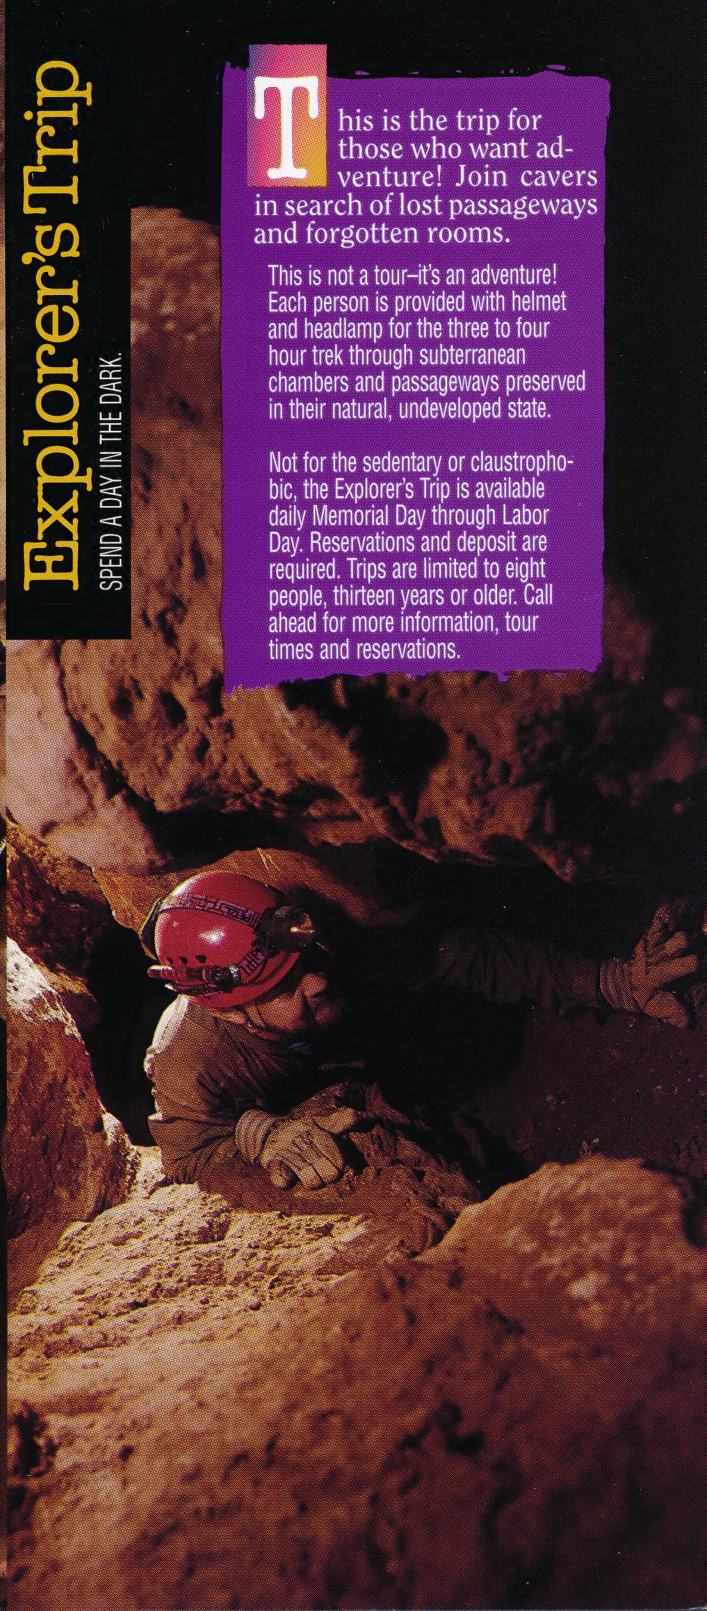
Explorer's Trip

SPEND A DAY IN THE DARK.

This is the trip for those who want adventure! Join cavers in search of lost passageways and forgotten rooms.

This is not a tour–it's an adventure! Each person is provided with helmet and headlamp for the three to four hour trek through subterranean chambers and passageways preserved in their natural, undeveloped state.

Not for the sedentary or claustrophobic, the Explorer's Trip is available daily Memorial Day through Labor Day. Reservations and deposit are required. Trips are limited to eight people, thirteen years or older. Call ahead for more information, tour times and reservations.



LaserCanyon

WE'RE A MAGIC MOUNTAIN AFTER DARK.

Outside, with the skyline of Colorado Springs as a backdrop, the Pikes Peak region's colorful history explodes onto the canyon walls five stories high!

Cave of the Winds presents a sight and sound extravaganza through the technology of lasers and stereophonic sound every night after sundown from Memorial Day weekend through Labor Day weekend.

Laser Canyon is a grand finale to any summer evening.

LanternTour

EXPERIENCE THE PAST, TODAY.

One hundred years ago visitors to Cave of the Winds carried candles and lanterns along eerie, dark halls that seemed to have no end into mysterious chambers so large that the fragile light they carried never reached the other side. Now you can too.

Spend an hour or more with an authentically dressed 1800's guide viewing truly spectacular rooms using only the illumination from your hand held candle lantern. Direct your light into nooks, crannies, tunnels and chambers that once were believed to be the homes of gnomes and fairies. On tour learn about life in the 1800's and enjoy unbelievable stories and tales about the cave's first owners and its visitors.

Tours are available daily during the summer. Reservations are suggested.
